Auto video conversion engine

- Auto video conversion engine compresses and converts videos automatically. It supports most video formats and shortens the video handling time. BlueEyes spent about 6 months to develop this unique function so that you can spend your time on other things.

24H trial lessons

- LOL offers 24H trial lessons for students, allowing them to evaluate course content and teacher quality.

Customizable web interface

- Customizable web interface helps you create your own LOL style. 24-hour advertising with embedded marketing allows greater publicity and exposure on the internet.

Designed just for you

- Upload pictures to create your own photo albums.
- Send instant messages, exam results, and important notices via SMS. Save your own preset messages and send unlimited text via imported EXCEL file.
- Monitor delivery status with package tracking functionality.

Powerful administration management

- Grant user points.
- Watermark function.
- Secure copyright protection technology.
- Free registration via Facebook or Google+.
- Save your own preset messages and send unlimited text via SMS.
- Flexible course and video publishing functionality.
- Customizable permissions for teachers and students.
- Free advertising via trial packages.
- Advanced dynamic watermark module effectively prevents pirating.
